

Can We Retain More Students Fall-to-Winter?

One of the best ways to combat enrollment decline is also one of the best ways to promote student success. Anything we can do to encourage *continuous enrollment* will help students reach goals even as it addresses total enrollment.

Overall, 70% of Lane's Fall 2021 students enrolled in Winter 2022. *Let's retain more students fall-to-winter this year!*

This bar chart is *not* meant to compare departments, but to allow departments to see where their students now stand in the registration process compared to where they ended last year. If, by week four of Winter, each department has even 1% higher retention than last year, this would be a boon to enrollment *and* to student success.

We are all here to support Lane's student success mission and we can all have an impact on retention. We can act on opportunities to discuss students' academic plans and connect them with resources. We can explain that continuous enrollment is a key to success. **We can remind students that registration is open and urge them to enroll for Winter now.**

Watch for updated data in a Winter edition of TIPSS.

Department Students Registered for Winter So Far
